For Fixing to : Flat surface where a suitable fixing can be achieved, both horizontally or vertically.	

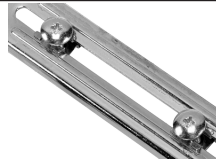

The HFX is a British made bracket with unique advantages for the electrician.

Complete with pre-inserted friction spring clips and M6x16 case hardened tray bolts.

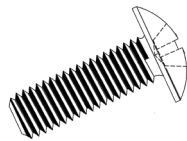

No need for back nuts.

The friction spring clips can be easily repositioned by hand or using combination pliers along the length of the slots.

The clip thread has a lead-in to allow for easier insertion.

Tray bolts have a No.2 pozi recess and are mushroom head that allowing for

Clips will remain in position even when fixed in the vertical position.

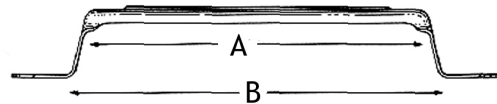

easier installation by using a pozi screwdriver or a Cordless Driver on a low torque setting.

With a 25mm stand-off there is

Tray Bolts Included

easy access to back of tray.

Sizes to suit up to 450mm tray available.
